Vuelogic – Daisy-Chain Extension Microphone for Vuelogic Videobars

Extension Microphone for Vuelogic Videobars: Clear Communication and Extended Range

The Extension Microphone for Vuelogic Videobars is designed to provide crystal-clear audio communication with an extended range of 3-5 meters. This innovative technology ensures that every voice is captured with precision, making it ideal for professional meetings and conferences.

- **Advanced Audio Processing:** Supports AEC, AGC, ANS, and full duplex communication for optimal sound quality and clarity. This ensures that every word is heard without any distortion or background noise, enhancing the overall communication experience.

- **Expandable Pickup Range:** Allows for cascading of up to three microphones, extending the pickup range for larger meeting spaces. This flexibility ensures that every participant's voice is captured, even in challenging acoustic environments.

- **Intuitive Mic Control:** Features a mic mute button with LED feedback, allowing users to easily control the microphone status. This simple yet effective design ensures seamless communication without any interruptions.

- **Easy Connectivity:** Designed for use with VL-VB300 over Cat cable, with included extension dongles for added convenience. This plug-and-play setup makes it easy to integrate the microphone array into any existing audio system.

- **Effortless Control Options:** Manage the microphone settings with ease, ensuring a smooth operation. Whether using the front panel buttons, remote control, or software interface, the microphone array offers versatile control options for a hassle-free user experience.

Enhance Your Audio Communication Setup

The Extension Microphone for Vuelogic Videobars is the perfect solution for professional audio communication needs. With its advanced features and extended range, this microphone array ensures clear and seamless communication in any setting.

Features

- Quad array of MEMS omnidirectional microphones with a range of 3-5 meters
- Supports AEC, AGC, ANS and full duplex communication
- Supports cascading of up to three microphones for extending pickup range
- Mic mute button with LED feedback
- For use with VL-VB300 over Cat cable with included extension dongles
